

Forest Monitoring by Satellites

Open Information and Consultation Day for CSOs/NGOs
on EO for Ecosystems Conservation/Restoration

14 October 2022

Frank Martin Seifert
ESA Earth Observation Programmes
Department of Science, Applications and Climate

ESA UNCLASSIFIED – For ESA Official Use

Introduction

Tools & Platforms

EO Application on forests in Europe

Global applications in forestry

Summary

Why Forests?

Livelihood for indigenous people

Food and medicine

Income from timber and non-timber products

Carbon sink

Biodiversity of plants and animals

Flood control and tsunami mitigation

Clean drinking water and air

Ecosystem Services

Fuel wood and charcoal

Influence rainfall patterns

Erosion control and landslide prevention

Recreation and tourism

EO and Policy Sector related to Forestry

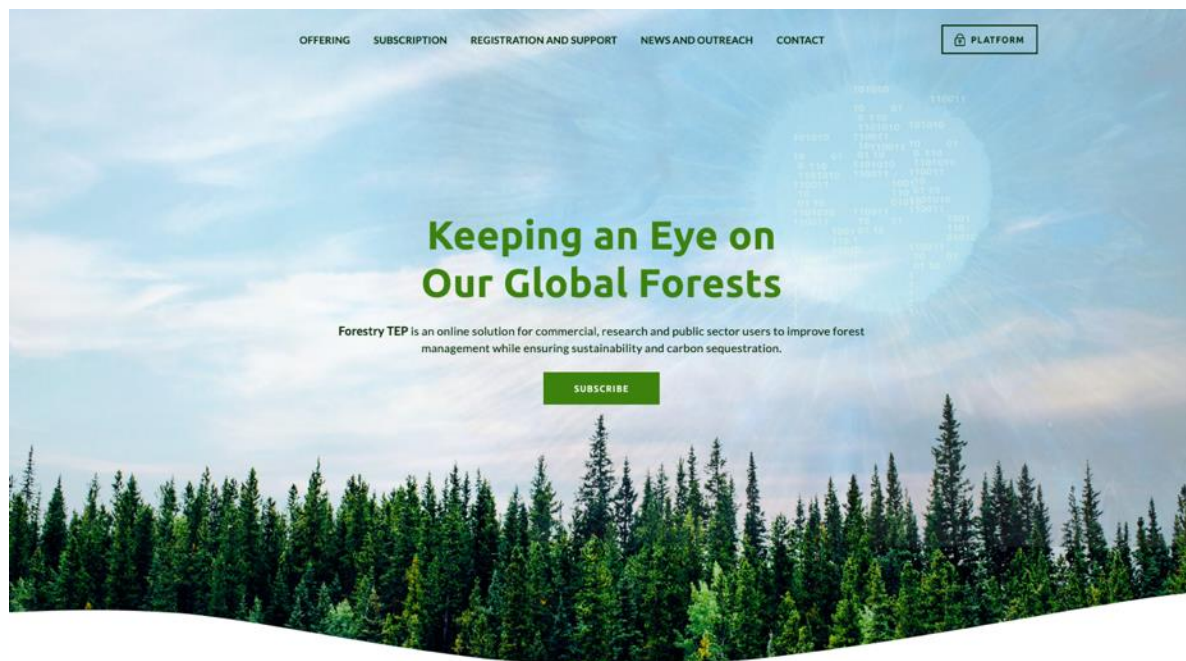

- Attributes of EO: **global, transparent, independent, timely**
- Supporting of policies, in particular for
 - **scientific rationale,**
 - **policy analysis,**
 - **monitoring and**
 - **compliance purposes**
- **Collect and translate** policy needs into technical requirements for EO products and services
- **Ensure** the delivery of concrete solutions or applications **meeting the policy needs**

Green Deal,
Forest Strategy,
Farm to Fork,
Biodiversity Strategy,
Bioeconomy Strategy,
FLEGT, ...

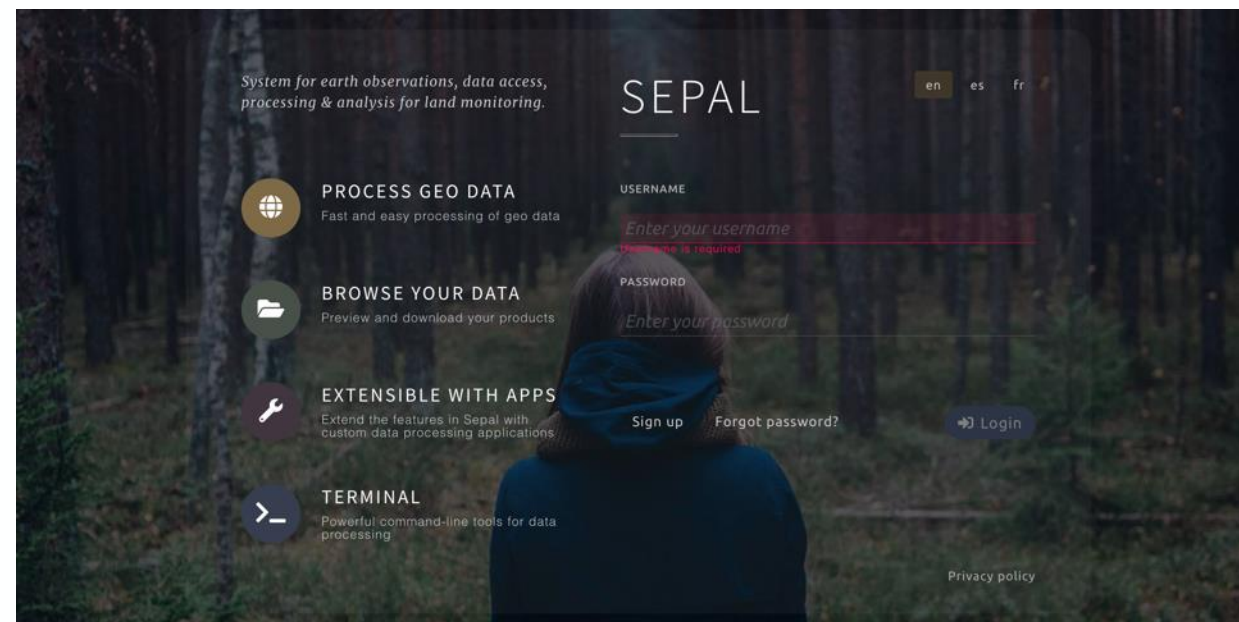

Platforms – Bring the People to the Data!

One-stop shop for forestry remote sensing services for the academic, public and commercial sectors.

<http://f-tep.com>

System for Earth Observation, Data Access, Processing and Analysis for Land Monitoring

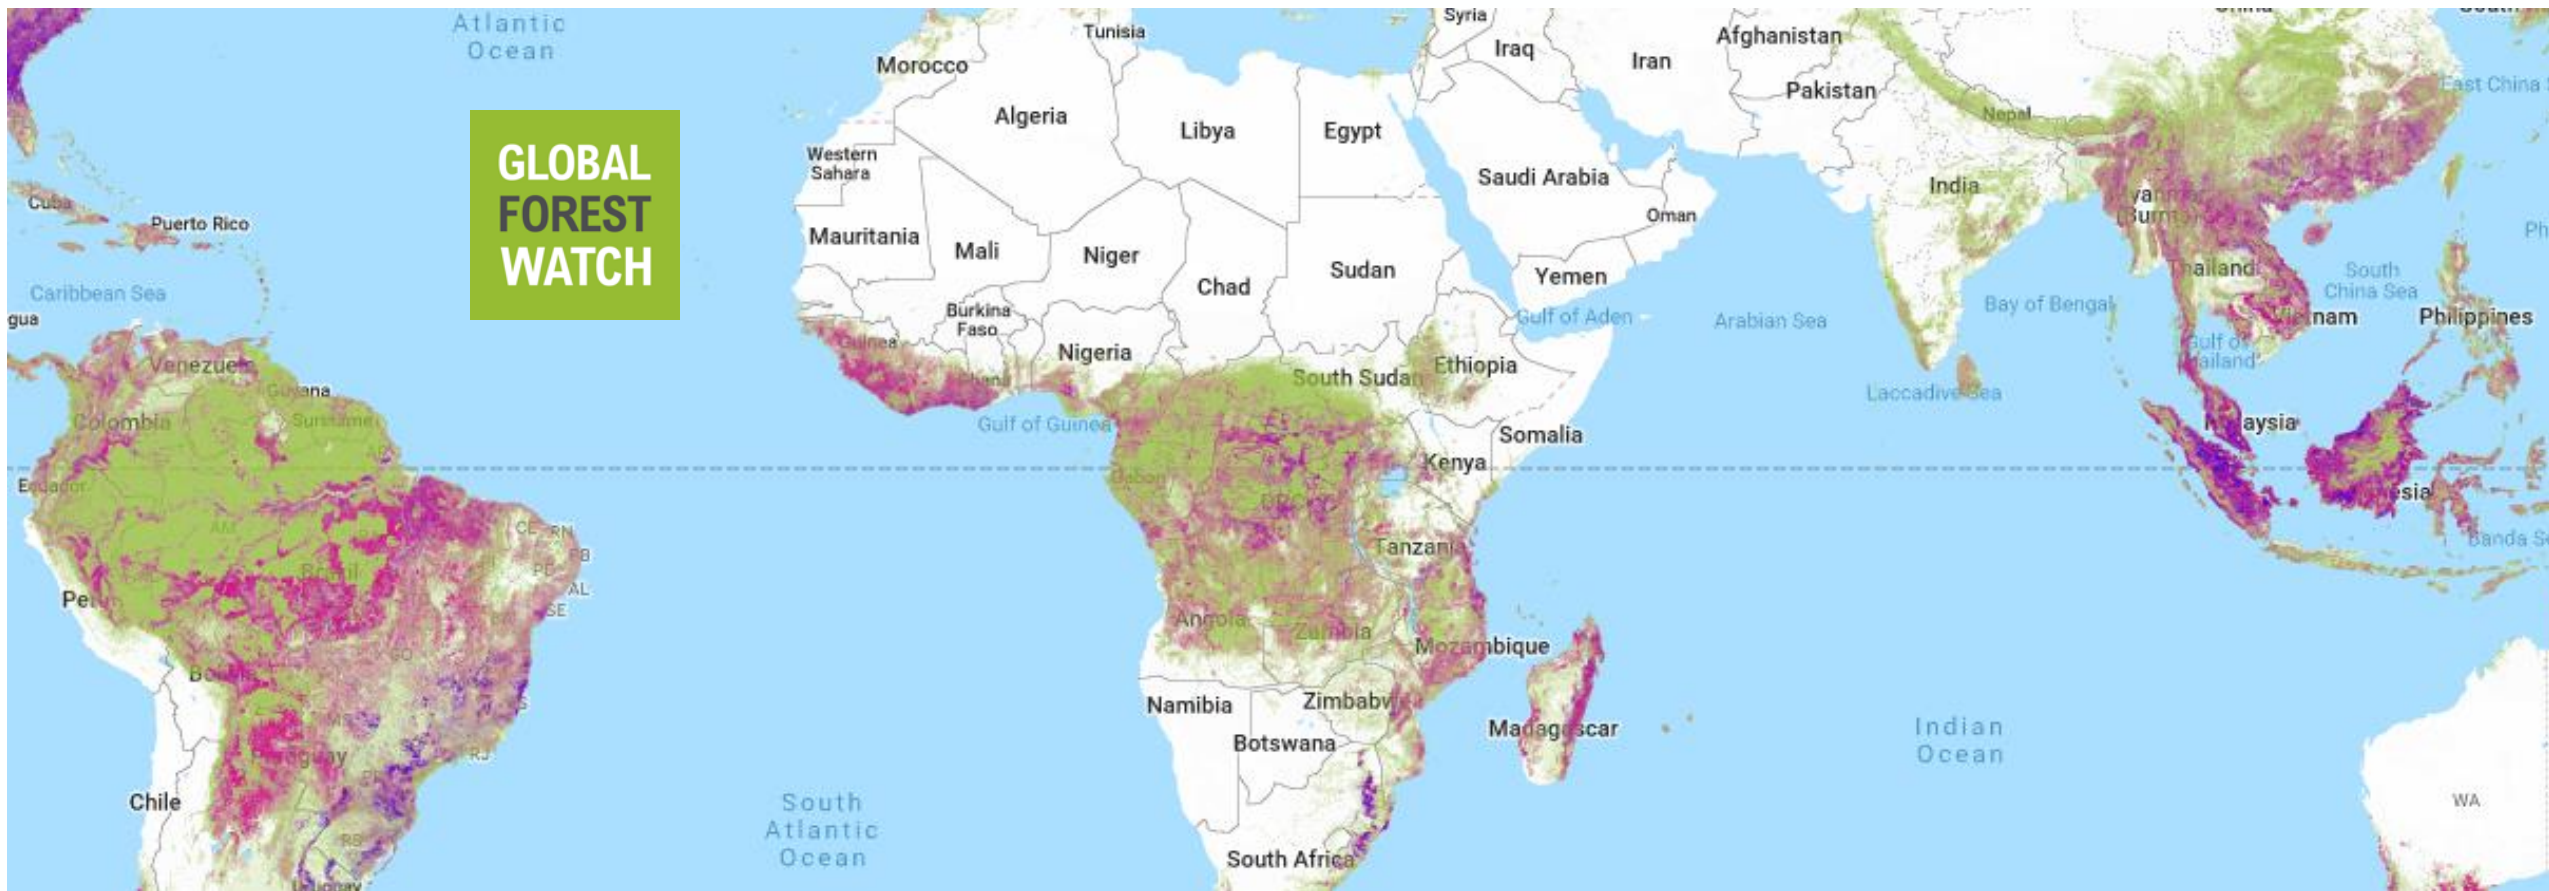

Part of the geospatial tools OpenForis at FAO

<http://sepal.io>

Global Forest Watch

An online platform that provides data and tools for monitoring forests.

<https://www.globalforestwatch.org/>

Forest Applications in Europe

HRL TreeCoverDensity

Tree Cover Density

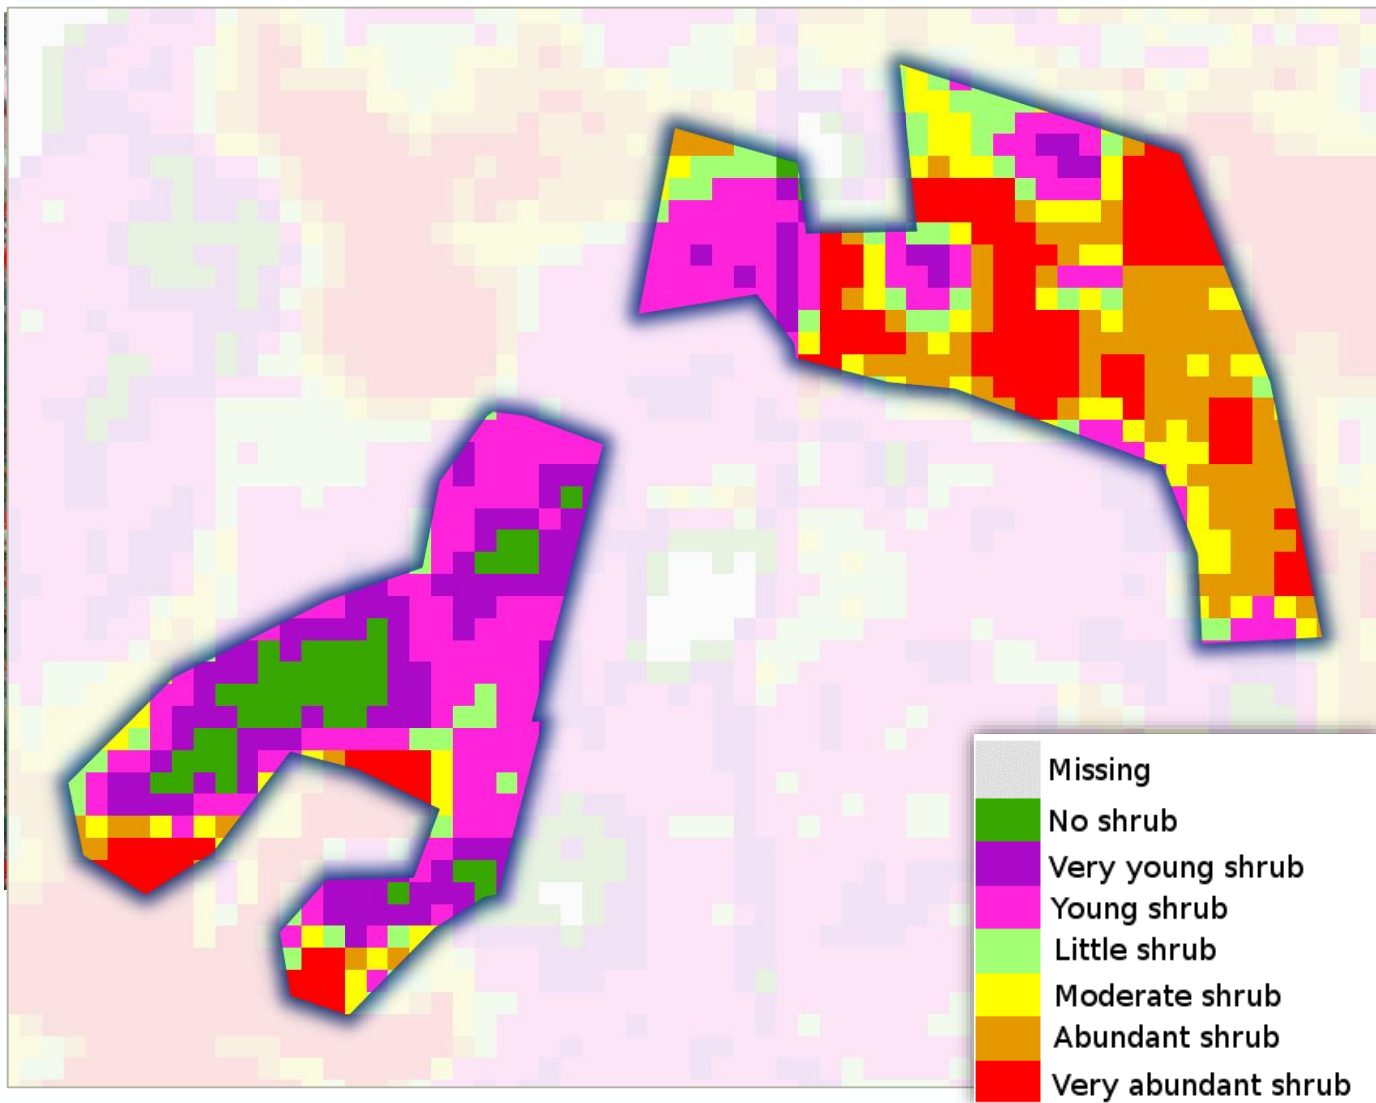

- All Non Tree Areas
- 1 - 20 %
- 21 - 40 %
- 41 - 60 %
- 61 - 80 %
- 81 - 100 %
- Unclassifiable
- Outside Area

Event Time (UTC): 2021-08-16 09:29
Event Time (LOC): 2021-08-16 09:29
Event Type: Wildfire (Forest fire)
Activation Time (UTC): 2021-08-17 07:03
Activation Status: Closed

Service Output: 5 products (7 maps)
First Estimate: 1 products (1 maps)
Delineation: 2 products (2 maps)
Grading: 2 products (4 maps) Authorised
User: Greece General secretariat for Civil
protection - Directorate for Emergency
Planning and Response

Mapping of harmful broadleaved shrubs in forest regeneration areas based on Sentinel-2 data

- Production: VTT
- Customer: Finnish Forest Centre
- Impact: Operational use planned
- Article: [Space helps forests regenerate](https://f-tep.com/)

Image (left): detail - shrub abundance on two forest regeneration areas with stand borders

<https://f-tep.com/>

Forest management - Forest variable estimation

- Stem volume per species

Red = Broadleaved

Blue = Pine

Green = Spruce

VTT

Bark Beetle Infestation

Bark beetle infestation progression (14-day) and infestation probability over the beetle season 2018

No data (<i>e.g.</i> clouds)	
Water	
Non-tree cover	
≤ 50 m ³ /ha	
51-100 m ³ /ha	
101-150 m ³ /ha	
151-200 m ³ /ha	
201-250 m ³ /ha	
251-300 m ³ /ha	
> 300 m ³ /ha	

Tropical Forests

Local Deforestation

Rondonia, Brazil

Sentinel 2

5 June 2019

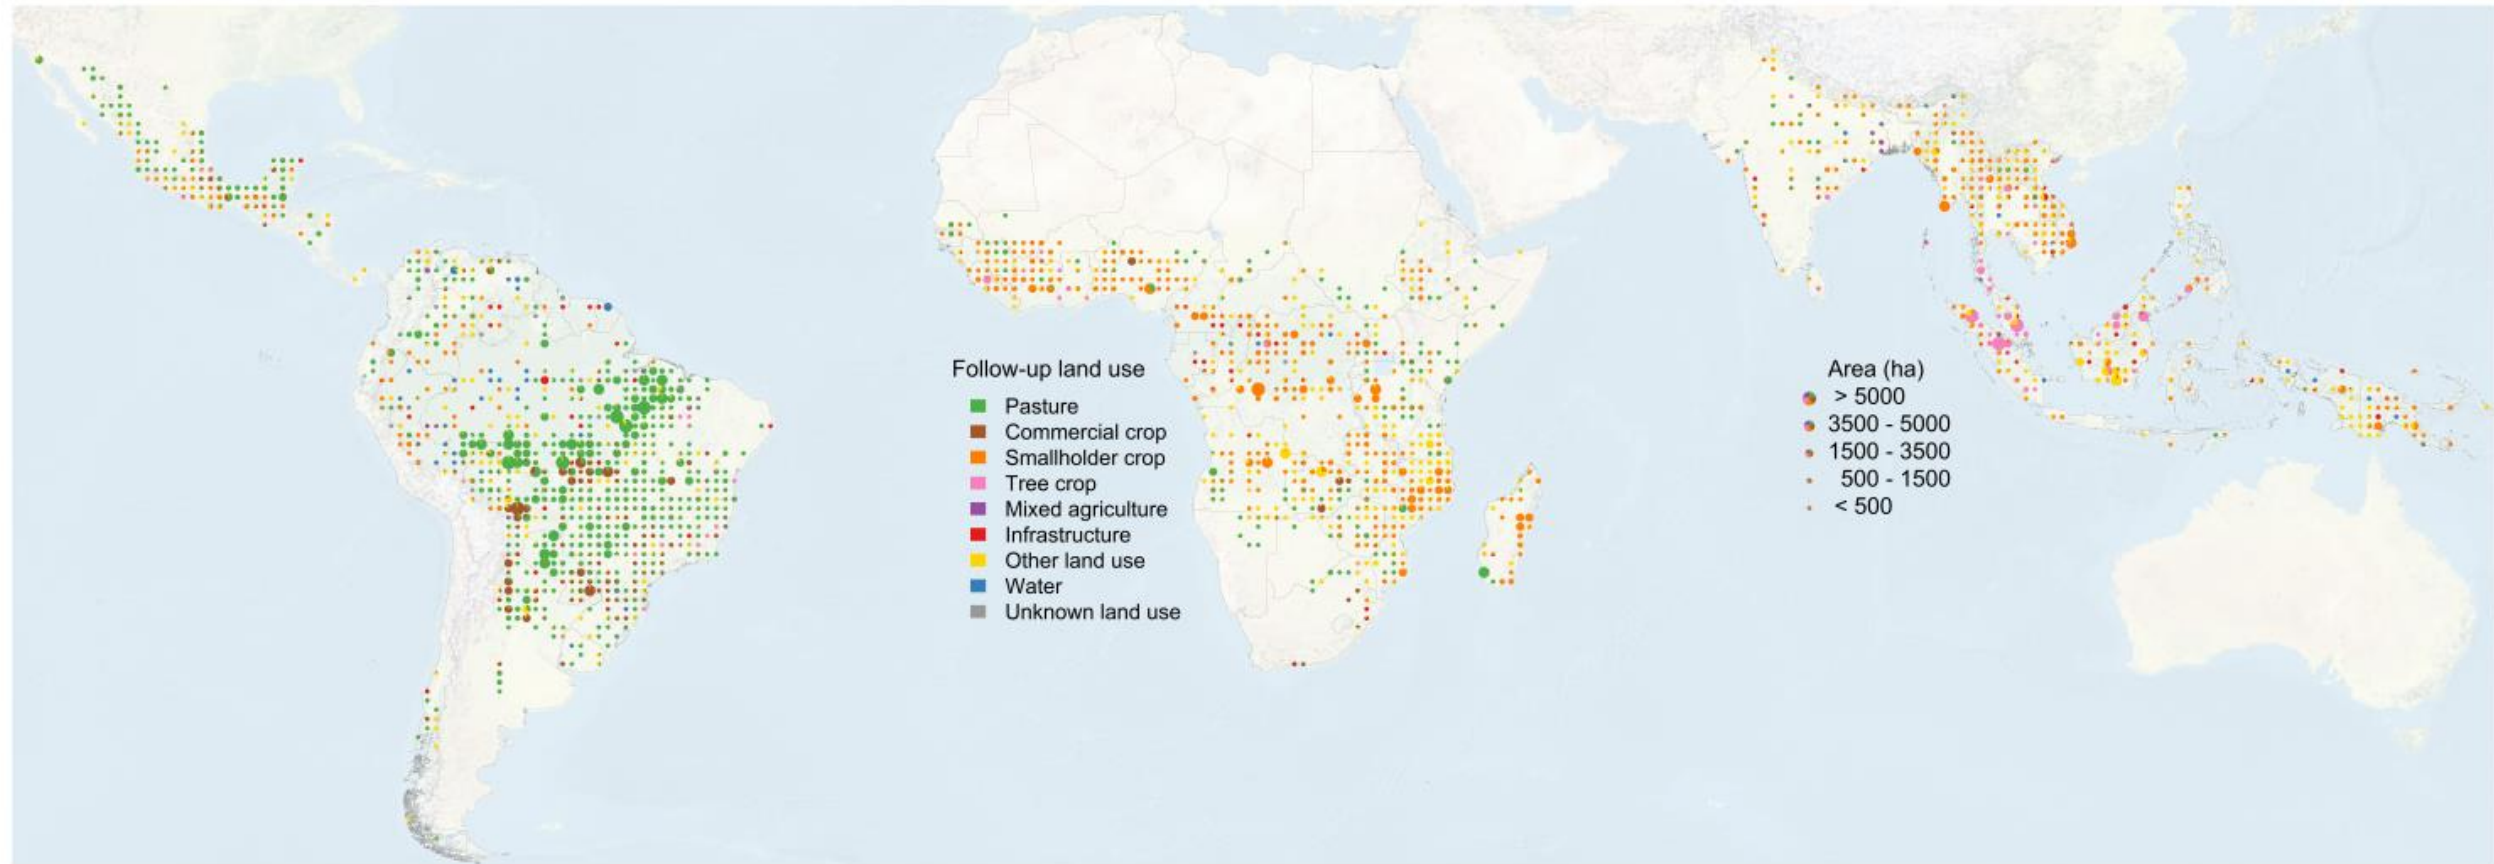

20 km

ESA UNCLASSIFIED – For Official Use

European Space Agency

[De Sy et al., 2019, Tropical deforestation drivers and associated carbon emission factors derived from remote sensing data, ERL](#)

RADD (RAdar for Detecting Deforestation) Alerts - based on dense Sentinel-1 time series

Central African Republic
RADD Alerts 2019 –2021
Selective logging

31192)

Forest Disturbance Maps Gabon

Dec 2015 - April 2017

Synergy of S-1 and S-2

Sentinel-1 based forest
disturbance map: 7201 ha

Sentinel-2 based forest
disturbance map: 13763 ha

Combination of Sentinel-1 & Sentinel-2
based disturbance maps: 15723 ha

Blue =	only S1:	1960 ha
Red =	only S2:	8522 ha
Yellow =	S1 & S2:	5241 ha

- Global maps 2010, 2017 & 2018
- 2020 map under validation for COP27
- Consistency: a decade of change

- International collaboration to:
 - foster sustained availability of satellite and ground observation in support of national forest information systems
 - support countries in the use of observations for their national forest information systems

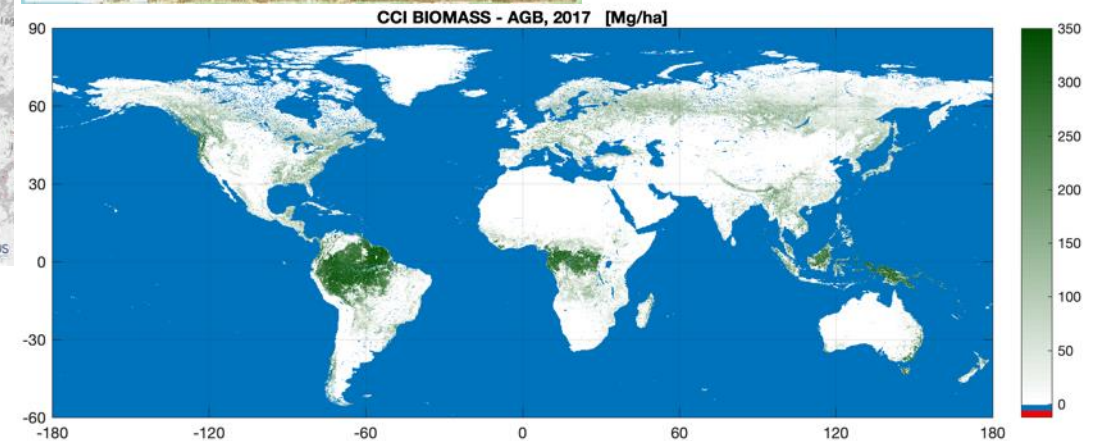

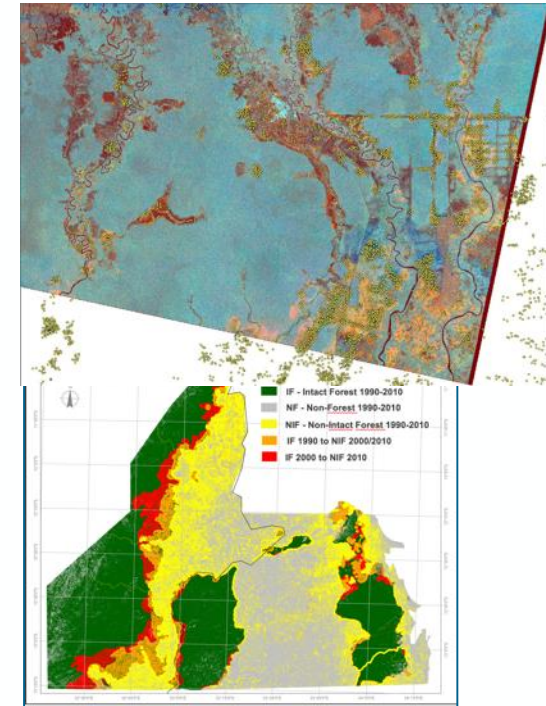

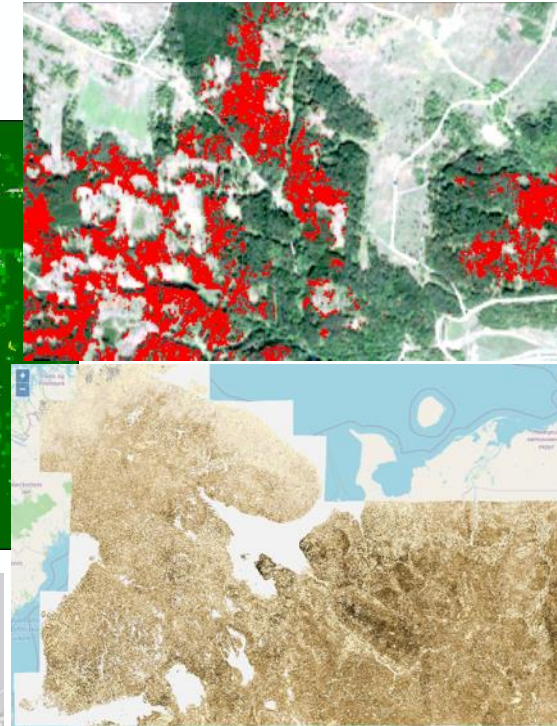

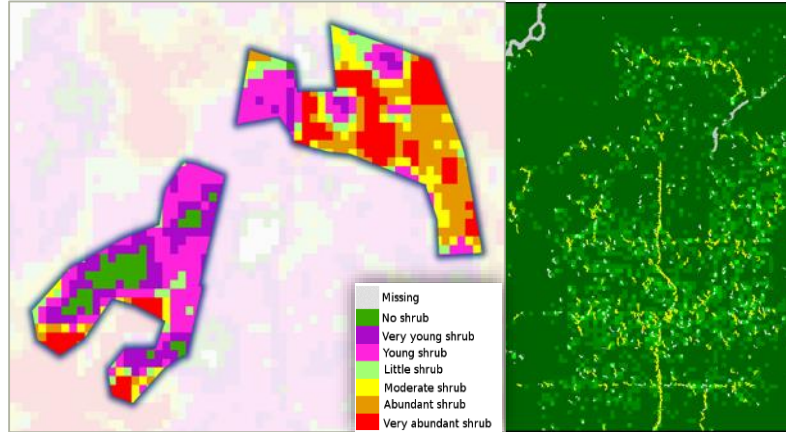

Federal Ministry
for Economic Cooperation
and Development

EO applications in forestry

- Sustainable forest management
- Illegal logging
- Forest health
- Insect infestation
- Storm damage
- Forest certification
- Forest fires & burned area
- Forest restoration
- Biomass and Bioenergy
- Carbon accounting
- Sustainable supply chains
- Climate change mitigation – REDD+

Take Home Message

- Forests are a **complex ecosystem**, home for plants, animals and people;
- Satellite data gained an **increased recognition** in the forestry and the policy sector;
- **Long term data availability** by Copernicus Sentinels for the next 20+ years;
- **Full, free and open-access** satellite data enable **transparency** of information;
- Use satellite data in **synergy** with in-situ knowledge and models;
- We are in a **data rich period**, a good basis for high quality products and services, with clear **uncertainty** levels and **consistency** over time;
- New IT capabilities like cloud computing and AI enable **dense time series analysis** at large scale;
- Platforms improve connection between data / users / information products for monitoring and can **bridge the digital divide**;

Thanks for your attention!
